KRISHNA SATHYAN

FRONTEND DEVELOPER

krishnasathyan11@gmail.com   7736875653   github.com/KRISHNASATHYAN11   linkedin.com/in/krishnasathyan07

Enthusiastic and dedicated React Developer currently training in the MERN Stack. Skilled in React.js, JavaScript (ES6+), HTML5, CSS3, and creating responsive CRUD applications. Familiar with state management, props, and component-based architecture in React. Passionate about building user-friendly interfaces, improving problem-solving skills, and continuously learning backend technologies like Node.js, Express.js, and MongoDB to become a full-stack developer.

PROFESSIONAL EXPERIENCE

Internship Experience

Intern | Luminar Technolab | Thiruvananthapuram | June-2025 - Present

Collaborated on developing and maintaining responsive web pages using React .

Assisted in debugging UI components and optimizing performance.

Gained hands-on experience with GIT and version control.

EDUCATION

Bachelor of Science (B.Sc) in Botany

University of Kerala , Thiruvananthapuram | 2022

CGPA : 8.01 / 10
- **Relevant Coursework:** Computer Fundamentals , Data Interpretation , Environmental Studies , Statistical Analysis.

Higher Secondary Education

G.H.S.S , Cherunniyoor , 2019   -   Percentage : 82 %

Secondary School Leaving Certificate (SSLC)

G.H.S.S , Cherunniyoor , 2017 - Percentage : 94%

PROJECTS

- **SPORTS COMMUNITY WEB APP - (Ongoing)**

Sportify is a sports community web app that helps people find teammates, book playgrounds, and organize local matches or tournaments — bringing real-life playtime and social connection back into people's lives. Built with the MERN stack (MongoDB, Express, React, Node.js), it delivers a fast, secure, and seamless experience through a clean React interface, JWT-based authentication, and structured backend APIs. Users can explore nearby matches, view upcoming events, manage team invitations, create tournaments, and track their own performance stats like matches played, wins, and ranking. The system includes a powerful Admin Panel where admins can manage users, approve grounds, monitor tournaments, and oversee reports for smooth platform operations. MongoDB stores well-defined collections such as Users, Teams, Grounds, Matches, Tournaments, and Requests — making Sportify a complete ecosystem for modern sports networking.

- RESUME BUILDING WEB APPLICATION

This project is a Resume Builder web application created using React and modern frontend tools. It uses Vite for fast builds, Bootstrap for responsive design, and includes features for live preview, form handling, and exporting resumes. The project follows best practices with ESLint for code quality and modular React components for scalability .

SKILLS

- HTML5
- CSS3
- JavaScript (ES6+)
- React.js
- Git & GitHub

- Bootstrap
- Currently learning: MongoDB , Node.js, Express.js

CERTIFICATIONS

Modern React From The Beginning - Ongoing , 2025
ME(A)RN Stack Web Development Expert - Ongoing , 2025
Certification in Data Entry and Console Operation - October , 2022
B.Sc. in Botany - University of Kerala , 2022
